

Figure 3-27.

2021 Average Response Times			2022 Average Response Times			Change: '21-'22	
	Average Enroute Time	Average Onscene Time		Average Enroute Time	Average Onscene Time	E/R	O/S
365	07:37	11:31	365	8:42	13:48	1:05	2:17
364	08:20	09:24	364	9:17	14:26	0:57	5:02
3617	05:17	09:19	3617	11:19	14:39	6:02	5:20
367	06:40	11:26	367	8:47	11:34	2:07	0:08
Chief's	07:04	10:55	Chief's	3:31	8:57	-0:03:33	-0:01:58

These table represent the cumulative averages for enroute and onscene times broken down by each piece of the Mendon Fire Distrcit apparatus. That data is taken from response time exports for the Red Alert reporting system from a period of 2021. "Chief's" correspond with the three Chiefs and there for show their response times. It can be useful to compare these enroutre times with the remaining pieces of apparatus to asertain the additional amount of time that it take for volunteer staff to report to and response on a piece of apparatus. In many cases this time can be 4 to 5 minutes.
